

## 2019 年 6 月大学英语六级考试真题试卷(第 2 套)

### Part I Writing (30 minutes)

**Directions:** For this part, you are allowed 30 minutes to write an essay on the importance of mutual understanding and respect in interpersonal relationships. You should write at least 150 words but no more than 200 words.

---

---

---

### Part II Listening Comprehension (30 minutes)

#### Section A

**Directions:** In this section, you will hear two long conversations. At the end of each conversation, you will hear four questions. Both the conversation and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.

**Questions 1 to 4 are based on the conversation you have just heard.**

1. A) Why *Roman Holiday* was more famous than *Breakfast at Tiffany's*.  
B) Why Audrey Hepburn had more female fans than male ones.  
C) Why the woman wanted to be like Audrey Hepburn.  
D) Why so many girls adored Audrey Hepburn.
2. A) Her unique personality.  
B) Her physical condition.  
C) Her shift of interest to performing arts.  
D) Her family's suspension of financial aid.
3. A) She was not an outgoing person.  
B) She was easy-going on the whole.  
C) She was modest and hardworking.  
D) She was usually not very optimistic.
4. A) She was influenced by the roles she played in the films.  
B) Her parents taught her to sympathize with the needy.  
C) She learned to volunteer when she was a child.  
D) Her family benefited from other people's help.

**Questions 5 to 8 are based on the conversation you have just heard.**

- |                                     |                                |
|-------------------------------------|--------------------------------|
| 5. A) Give a presentation.          | C) Start a new company.        |
| B) Raise some questions.            | D) Attend a board meeting.     |
| 6. A) It will cut production costs. | C) No staff will be dismissed. |

- B) It will raise productivity.
- 7.A) The timeline of restructuring.
- B) The reasons for restructuring.
- 8.A) By consulting their own department managers.
- B) By emailing questions to the man or the woman.
- C) By exploring various channels of communication.
- D) By visiting the company's own computer network.
- D) No new staff will be hired.
- C) The communication channels.
- D) The company's new missions.

## Section B

**Directions:** *In this section, you will hear two passages. At the end of each passage, you will hear three or four questions. Both the passage and the questions will be spoken only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.*

**Questions 9 to 11 are based on the passage you have just heard.**

- 9.A) It helps passengers to take care of their pet animals.
- B) It has animals to help passengers carry their luggage.
- C) It uses therapy animals to soothe nervous passengers.
- D) It allows passengers to have animals travel with them.
- 10.A) Avoiding possible dangers.
- B) Finding their way around.
- 11.A) Schedule their flights around the animal visits.
- B) Photograph the therapy animals at the airport.
- C) Keep some animals for therapeutic purposes.
- D) Bring their pet animals on board their plane.
- C) Identifying drug smugglers.
- D) Looking after sick passengers.

**Questions 12 to 15 are based on the passage you have just heard.**

- 12.A) Beside a beautifully painted wall in Arles.
- B) Beside the gate of an ancient Roman city.
- C) At the site of an ancient Roman mansion.
- D) At the entrance to a reception hall in Rome.
- 13.A) A number of different images.
- B) A number of mythological heroes.
- 14.A) The originality and expertise shown.
- B) The worldly sophistication displayed.
- C) The stunning images vividly depicted.
- D) The impressive skills and costly dyes.
- 15.A) His artistic taste is superb.
- B) His identity remains unclear.
- C) Various musical instruments.
- D) Paintings by famous French artists.
- C) He was a collector of antiques.
- D) He was a rich Italian merchant.

## Section C

**Directions:** *In this section, you will hear three recordings of lectures or talks followed by three or four questions. The recordings will be played only once. After you hear a question, you must choose the best answer from the four choices marked A), B), C) and D). Then*

mark the corresponding letter on **Answer Sheet 1** with a single line through the centre.

**Questions 16 to 18 are based on the recording you have just heard.**

16. A) They encourage international cooperation.  
B) They lay stress on basic scientific research.  
C) They place great emphasis on empirical studies.  
D) They favour scientists from its member countries.
17. A) Many of them wish to win international recognition.  
B) They believe that more hands will make light work.  
C) They want to follow closely the international trend.  
D) Many of their projects have become complicated.
18. A) It requires mathematicians to work independently.  
B) It is faced with many unprecedented challenges.  
C) It lags behind other disciplines in collaboration.  
D) It calls for more research funding to catch up.

**Questions 19 to 21 are based on the recording you have just heard.**

19. A) Scientists tried to send a balloon to Venus.  
B) Scientists discovered water on Venus.  
C) Scientists found Venus had atmosphere.  
D) Scientists observed Venus from a space vehicle.
20. A) It resembles Earth in many aspects.  
B) It is the same as fiction has portrayed.  
C) It is a paradise of romance for alien life.  
D) It undergoes geological changes like Earth.
21. A) It might have been hotter than it is today.  
B) It might have been a cozy habitat for life.  
C) It used to have more water than Earth.  
D) It used to be covered with rainforests.

**Questions 22 to 25 are based on the recording you have just heard.**

22. A) Causes of sleeplessness.  
B) Cross-cultural communication.  
C) Cultural psychology.  
D) Motivation and positive feelings.
23. A) They attach great importance to sleep.  
B) They often have trouble falling asleep.  
C) They pay more attention to sleep efficiency.  
D) They generally sleep longer than East Asians.
24. A) By asking people to report their sleep habits.  
B) By observing people's sleep patterns in labs.  
C) By having people wear motion-detecting watches.  
D) By videotaping people's daily sleeping processes.
25. A) It has made remarkable progress in the past few decades.  
B) It has not yet explored the cross-cultural aspect of sleep.  
C) It has not yet produced anything conclusive.  
D) It has attracted attention all over the world.

## Part III

## Reading Comprehension

(40 minutes)

### Section A

**Directions:** In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Each choice in the bank is identified by a letter. Please mark the corresponding letter for each item on **Answer Sheet 2** with a single line through the centre. You may not use any of the words in the bank more than once.

Pasta is no longer off the menu. after a new review of studies suggested that the carbohydrate can form part of a healthy diet, and even help people lose weight. For years, nutritionists have recommended that pasta be kept to a 26, to cut calories, prevent fat build-up and stop blood sugar 27 up.

The low-carbohydrate food movement gave birth to such diets as the Arkins, Paleo and Keto, which advised swapping foods like bread, pasta and potatoes for vegetables, fish and meat. More recently the trend of swapping spaghetti for vegetables has been 28 by clean-eating experts.

But now a 29 review and analysis of 30 studies by Canadian researchers found that not only does pasta not cause weight gain, but three meals a week can help people drop more than half a kilogram over four months. The reviewers found that pasta had been unfairly *demonized* (妖魔化) because it had been 30 in with other, more fat-promoting carbohydrates.

“The study found that pasta didn’t 31 to weight gain or increase in body fat,” said lead author Dr John Sievenpiper. “In 32 the evidence, we can now say with some confidence that pasta does not have an 33 effect on body weight outcomes when it is consumed as part of a healthy dietary pattern.” In fact, analysis actually showed a small weight loss. So 34 to concerns, perhaps pasta can be part of a healthy diet.

Those involved in the 35 trials on average ate 3.3 servings of pasta a week instead of other carbohydrates, one serving equaling around half a cup. They lost around half a kilogram over an average follow-up of 12 weeks.

A) adverse  
B) championed  
C) clinical  
D) contrary  
E) contribute  
F) intimate  
G) lumped  
H) magnified

I) minimum  
J) radiating  
K) ration  
L) shooting  
M) subscribe  
N) systematic  
O) weighing

### Section B

**Directions:** In this section, you are going to read a passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph more than once. Each paragraph is marked with a letter. Answer the questions by marking the corresponding

### The Best Retailers Combine Bricks and Clicks

A) Retail profits are falling sharply. Stores are closing. Malls are emptying. The depressing stories just keep coming. Reading the earnings announcements of large retail stores like Macy's, Nordstrom, and Target is about as uplifting as a tour of an intensive care unit. The internet is apparently taking down yet another industry. *Brick and mortar stores* (实体店) seem to be going the way of the yellow pages. Sure enough, the Census Bureau just released data showing that online retail sales surged 15.2 percent between the first quarter of 2015 and the first quarter of 2016.

B) But before you dump all of your retail stocks, there are more facts you should consider. Looking only at that 15.2 percent "surge" would be misleading. It was an increase that was on a small base of 6.9 percent. Even when a tiny number grows by a large percentage terms, it is often still tiny.

C) More than 20 years after the internet was opened to commerce, the Census Bureau tells us that brick and mortar sales accounted for 92.3 percent of retail sales in the first quarter of 2016. Their data show that only 0.8 percent of retail sales shifted from offline to online between the beginning of 2015 and 2016.

D) So, despite all the talk about *drone* (无人机) deliveries to your doorstep, all the retail executives expressing anxiety over consumers going online, and even a Presidential candidate exclaiming that Amazon has a "huge antitrust problem", the Census data suggest that physical retail is thriving. Of course, the closed stores, depressed executives, and sinking stocks suggest otherwise. What's the real story?

E) Many firms operating brick and mortar stores are in trouble. The retail industry is getting "reinvented", as we describe in our new book *Matchmakers*. It's standing in the path of what Schumpeter called a *gale* (大风) of creative destruction. That storm has been brewing for some time, and as it has reached gale force, most large retailers are searching for a response. As the CFO of Macy's put it recently, "We're frankly scratching our heads."

F) But it's not happening as experts predicted. In the peak of the dot.com bubble, brick and mortar retail was one of those industries the internet was going to kill—and quickly. The dot.com bust discredited most predictions of that sort and in the years that followed, conventional retailers' confidence in the future increased as Census continued to report weak online sales. And then the gale hit.

G) It is becoming increasingly clear that retail reinvention isn't a simple battle to the death between bricks and clicks. It is about devising retail models that work for people who are making increasing use of a growing array of internet-connected tools to change how they search, shop, and buy. Creative retailers are using the new technologies to innovate just about everything stores do from managing inventory, to marketing, to getting paid.

H) More than drones dropping a new supply of underwear on your doorstep, Apple's massively successful brick-and-mortar-and-glass retail stores and Amazon's small steps in the same direction are what should keep old-fashioned retailers awake at night. Not to mention the large number of creative new retailers, like Bonobos, that are blending online and offline ex-

periences in creative ways.

I) Retail reinvention is not a simple process, and it's also not happening on what used to be called "Internet Time." Some internet-driven changes have happened quickly, of course. Craigslist quickly overtook newspaper classified ads and turned newspaper economics upside down. But many widely anticipated changes weren't quick, and some haven't really started. With the benefit of *hindsight* (后见之明), it looks like the internet will transform the economy at something like the pace of other great inventions like electricity. B2B commerce, for example, didn't move mainly online by 2005 as many had predicted in 2000, nor even by 2016, but that doesn't mean it won't do so over the next few decades.

J) But the gale is still blowing. The sudden decline in foot traffic in recent years, even though it hasn't been accompanied by a massive decline in physical sales, is a critical warning. People can shop more efficiently online and therefore don't need to go to as many stores to find what they want. There's a surplus of physical shopping space for the crowds, which is one reason why stores are downsizing and closing.

K) The rise of the mobile phone has recently added a new level of complexity to the process of retail reinvention. Even five years ago most people faced a choice. Sit at your computer, probably at home or at the office, search and browse, and buy. Or head out to the mall, or Main Street, look and shop, and buy. Now, just about everyone has a smartphone, connected to the internet almost everywhere almost all the time. Even when a retailer gets a customer to walk in the store, she can easily see if there's a better deal online or at another store nearby.

L) So far, the main thing many large retailers have done in response to all this is to open online stores, so people will come to them directly rather than to Amazon and its smaller online rivals. Many are having the same problem that newspapers have had. Even if they get online traffic, they struggle to make enough money online to compensate for what they are losing offline.

M) A few seem to be making this work. Among large traditional retailers, Walmart recently reported the best results, leading its stock price to surge, while Macy's, Target, and Nordstrom's dropped. Yet Walmart's year-over-year online sales only grew 7 percent, leading its CEO to *lament* (哀叹), "Growth here is too slow." Part of the problem is that almost two decades after Amazon filed the one-click patent, the online retail shopping and buying experience is filled with frictions. A recent study graded more than 600 internet retailers on how easy it was for consumers to shop, buy, and pay. Almost half of the sites didn't get a passing grade and only 18 percent got an A or B.

N) The turmoil on the ground in physical retail is hard to square with the Census data. Unfortunately, part of the explanation is that the Census retail data are unreliable. Our deep look into those data and their preparation revealed serious problems. It seems likely that Census simply misclassifies a large chunk of online sales. It is certain that the Census procedures, which lump the online sales of major traditional retailers like Walmart with "non-store retailers" like food trucks, can mask major changes in individual retail categories. The bureau could easily present their data in more useful ways, but they have chosen not to.

O) Despite the turmoil, brick and mortar won't disappear any time soon. The big

questions are which, if any, of the large traditional retailers will still be on the scene in a decade or two because they have successfully reinvented themselves, which new players will operate busy stores on Main Streets and maybe even in shopping malls, and how the shopping and buying experience will have changed in each retail category. Investors shouldn't write off brick and mortar. Whether they should bet on the traditional players who run those stores now is another matter.

36. Although online retailing has existed for some twenty years, nearly half of the internet retailers still fail to receive satisfactory feedback from consumers, according to a recent survey.
37. Innovative retailers integrate internet technologies with conventional retailing to create new retail models.
38. Despite what the Census data suggest, the value of physical retail's stocks has been dropping.
39. Internet-driven changes in the retail industry didn't take place as quickly as widely anticipated.
40. Statistics indicate that brick and mortar sales still made up the lion's share of the retail business.
41. Companies that successfully combine online and offline business models may prove to be a big concern for traditional retailers.
42. Brick and mortar retailers' faith in their business was strengthened when the dot.com bubble burst.
43. Despite the tremendous challenges from online retailing, traditional retailing will be here to stay for quite some time.
44. With the rise of online commerce, physical retail stores are likely to suffer the same fate as the yellow pages.
45. The wide use of smartphones has made it more complex for traditional retailers to reinvent their business.

### Section C

**Directions:** *There are 2 passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on **Answer Sheet 2** with a single line through the centre.*

#### Passage One

**Questions 46 to 50 are based on the following passage.**

Professor Stephen Hawking has warned that the creation of powerful artificial intelligence (AI) will be "either the best, or the worst thing, ever to happen to humanity", and praised the creation of an academic institute dedicated to researching the future of intelligence as "crucial to the future of our civilisation and our species".

Hawking was speaking at the opening of the Leverhulme Centre for the Future of Intelligence (LCFI) at Cambridge University, a multi-disciplinary institute that will attempt to tackle some of the open-ended questions raised by the rapid pace of development in AI re-

search. "We spend a great deal of time studying history," Hawking said, "which, let's face it, is mostly the history of stupidity. So it's a welcome change that people are studying instead the future of intelligence."

While the world-renowned physicist has often been cautious about AI, raising concerns that humanity could be the architect of its own destruction if it creates a super-intelligence with a will of its own, he was also quick to highlight the positives that AI research can bring. "The potential benefits of creating intelligence are huge," he said. "We cannot predict what we might achieve when our own minds are amplified by AI. Perhaps with the tools of this new technological revolution, we will be able to undo some of the damage done to the natural world by the last one—industrialisation. And surely we will aim to finally eradicate disease and poverty. And every aspect of our lives will be transformed. In short, success in creating AI could be the biggest event in the history of our civilisation."

Huw Price, the centre's academic director and the Bertrand Russell professor of philosophy at Cambridge University, where Hawking is also an academic, said that the centre came about partially as a result of the university's Centre for Existential Risk. That institute examined a wider range of potential problems for humanity, while the LCFI has a narrow focus.

AI pioneer Margaret Boden, professor of cognitive science at the University of Sussex, praised the progress of such discussions. As recently as 2009, she said, the topic wasn't taken seriously, even among AI researchers. "AI is hugely exciting," she said, "but it has limitations, which present grave dangers given uncritical use."

The academic community is not alone in warning about the potential dangers of AI as well as the potential benefits. A number of pioneers from the technology industry, most famously the entrepreneur Elon Musk, have also expressed their concerns about the damage that a super-intelligent AI could do to humanity.

46. What did Stephen Hawking think of artificial intelligence?

- A) It would be vital to the progress of human civilisation.
- B) It might be a blessing or a disaster in the making.
- C) It might present challenges as well as opportunities.
- D) It would be a significant expansion of human intelligence.

47. What did Hawking say about the creation of the LCFI?

- A) It would accelerate the progress of AI research.
- B) It would mark a step forward in the AI industry.
- C) It was extremely important to the destiny of humankind.
- D) It was an achievement of multi-disciplinary collaboration.

48. What did Hawking say was a welcome change in AI research?

- A) The shift of research focus from the past to the future.
- B) The shift of research from theory to implementation.
- C) The greater emphasis on the negative impact of AI.
- D) The increasing awareness of mankind's past stupidity.

49. What concerns did Hawking raise about AI?

- A) It may exceed human intelligence sooner or later.

- B) It may ultimately over-amplify the human mind.
- C) Super-intelligence may cause its own destruction.
- D) Super-intelligence may eventually ruin mankind.

50. What do we learn about some entrepreneurs from the technology industry?

- A) They are much influenced by the academic community.
- B) They are most likely to benefit from AI development.
- C) They share the same concerns about AI as academics.
- D) They believe they can keep AI under human control.

## Passage Two

Questions 51 to 55 are based on the following passage.

The market for products designed specifically for older adults could reach \$ 30 billion by next year, and *startups* ( 初创公司 ) want in on the action. What they sometimes lack is feedback from the people who they hope will use their products. So Brookdale, the country's largest owner of retirement communities, has been inviting a few select entrepreneurs just to move in for a few days, show off their products and hear what the residents have to say.

That's what brought Dayle Rodriguez, 28, all the way from England to the dining room of Brookdale South Bay in Torrance, California. Rodriguez is the community and marketing manager for a company called Sentab. The startup's product, Sentab TV, enables older adults who may not be comfortable with computers to access email, video chat and social media using just their televisions and a remote control.

"It's nothing new, it's nothing too complicated and it's natural because lots of people have TV remotes," says Rodriguez.

But none of that is the topic of conversation in the Brookdale dining room. Instead, Rodriguez solicits residents' advice on what he should get on his cheeseburger and how he should spend the afternoon. Playing cards was on the agenda, as well as learning to play *mahjong* ( 麻将 ).

Rodriguez says it's important that residents here don't feel like he's selling them something. "I've had more feedback in a passive approach," he says. "Playing pool, playing cards, having dinner, having lunch," all work better "than going through a survey of questions. When they get to know me and to trust me, knowing for sure I'm not selling them something—there'll be more honest feedback from them."

Rodriguez is just the seventh entrepreneur to move into one of Brookdale's 1, 100 senior living communities. Other new products in the program have included a kind of full-body blow dryer and specially designed clothing that allows people with disabilities to dress and undress themselves.

Mary Lou Busch, 93, agreed to try the Sentab system. She tells Rodriguez that it might be good for *someone*, but not for her.

"I have the computer and Face Time, which I talk with my family on," she explains. She also has an iPad and a smartphone. "So I do pretty much everything I need to do."

To be fair, if Rodriguez had wanted feedback from some more *technophobic* ( 害怕技术的 ) seniors, he might have ended up in the wrong Brookdale community. This one is located

in the heart of Southern California's aerospace corridor. Many residents have backgrounds in engineering, business and academic circles.

But Rodriguez says he's still learning something important by moving into this Brookdale community: "People are more tech-proficient than we thought."

And besides, where else would he learn to play mahjong?

51. What does the passage say about the startups?

- A) They never lose time in upgrading products for seniors.
- B) They want to have a share of the seniors' goods market.
- C) They invite seniors to their companies to try their products.
- D) They try to profit from promoting digital products to seniors.

52. Some entrepreneurs have been invited to Brookdale to \_\_\_\_\_.

- A) have an interview with potential customers
- B) conduct a survey of retirement communities
- C) collect residents' feedback on their products
- D) show senior residents how to use IT products

53. What do we know about Sentab TV?

- A) It is a TV program catering to the interest of the elderly.
- B) It is a digital TV which enjoys popularity among seniors.
- C) It is a TV specially designed for seniors to view programs.
- D) It is a communication system via TV instead of a computer.

54. What does Rodriguez say is important in promoting products?

- A) Winning trust from prospective customers.
- B) Knowing the likes and dislikes of customers.
- C) Demonstrating their superiority on the spot.
- D) Responding promptly to customer feedback.

55. What do we learn about the seniors in the Brookdale community?

- A) Most of them are interested in using the Sentab.
- B) They are quite at ease with high-tech products.
- C) They have much in common with seniors elsewhere.
- D) Most of them enjoy a longer life than average people.

## Part IV

## Translation

(30 minutes)

**Directions:** For this part, you are allowed 30 minutes to translate a passage from Chinese into English. You should write your answer on **Answer Sheet 2**.

成语 (Chinese idioms) 是汉语中一种独特的表达方式, 大多由四个汉字组成。它们高度简练且形成固定, 但通常能形象地表达深刻的含义。成语大多来源于中国古代的文学作品, 通常与某些神话、传说或者历史事件有关。如果不知道某个成语的出处, 就很难理解其确切含义。因此, 学习成语有助于人们更好地理解中国传统文化。成语在日常会话和文学创作中广泛使用。恰当使用成语可以使一个人的语言更具表现力, 交流更有效。
